

W SOUND SUITE

W TORONTO | Curves

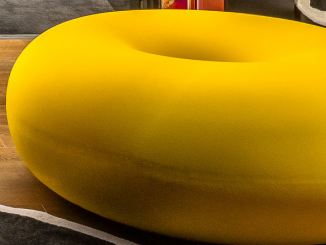

Get ready for fresh sounds and fresh looks at
W Sound Suite in collaboration with Curves by Sean Brown.

Immerse yourself in a sound studio for artists, musicians,
and novices alike. From light recordings to live streaming,
podcasting and acoustic performances, W Sound Suite is
your spot to be inspired.

Featuring Curves lineup of bespoke furnishings, iconic CD
rugs, and music-inspired décor, the perfect backdrop for
creativity awaits.

GET READY TO LET THE MUSIC PLAY.

W TORONTO | Curves

HIT RECORD

Sound off, sing your heart out, let the music play and be inspired.
Book W Sound Suite for custom recording services and listening sessions.

Podcast Prerecord

Equipped with SM7B Broadcast Microphones and the ability to multi track the audio captured.

Presentation Video and Voice

A studio for professionals to record Voice and Video. For example, pre record for a Virtual Town Hall or a Voice over for a presentation.

Acoustic Performance Capture

Equipped to capture up to 6 channels of multi tracked audio. This can be used to capture live acoustic performances or DJ sets.

Listening Sessions

With a selection of vinyl on rotation, reserve W Sound Suite and relax to your favourite sounds. Minimum two (2) hour booking required.

All recording, podcasting & streaming services include a professional audio engineer to ensure a quality session.

LIGHT, CAMERA, ACTION

W Sound Suite is the perfect spot for live or pre-recorded broadcasts and streaming.

Live Stream Presentation

Live virtual presentations with a soundproof room, professional audio equipment, DSLR, and streaming platforms for the best quality streamed video available.

Live Stream Podcast

Equipped with SM7B Broadcast Microphones with an array of streaming options for podcasters.

Live Streaming & PreRecords

The V-Mix Suite and Hardline bandwidth of the Sound Suite can be used to live Stream prerecorded content.

Live Stream Musics & Events

The V-Mix Suite and audio interfacing make the Sound Suite an excellent place for DJ's to live stream their music for virtual events.

All recording, podcasting & streaming services include a professional audio engineer to ensure a quality session.

THE EQUIPMENT LIST

W Sound Suite includes access to the front multi-use lounge room, the back semi-sound proofed recording room and comes equipped with the existing equipment below.

DETAILS

For all recording, podcasting, and streaming services, rates are included to cover up to 4 hours of studio time with one of Encore's professional audio engineers, who will assist throughout your session. Additional fees apply if you require an engineer for longer than 4 hours. Alternatively, you are welcome to bring your own professional audio engineer to the session. To learn more and discuss your specific needs, contact us to schedule a discovery call.

Room will be inspected after session and a \$500+ fee applies to any damages to Sound Suite or equipment.

Please check in at the Welcome Desk prior to session and our leaders will be there to assist you.

Disclaimers

While the Sound Suite is equipped with acoustic panels, it is not 100% soundproof, and some ambient noise may be audible in the control room and studio. Client is responsible for providing their own storage media (Ex. USB Sticks or Hard Drives) for recordings.

Post-edit production is not included; but can be booked separately through Encore's Media Lab.
